Professional Summary

Results-driven Cybersecurity Researcher skilled in penetration testing, threat detection, SIEM operations, and network security. Delivered 50+ training sessions and CTF events. Experienced in analyzing security logs, and detecting threats using tools like Splunk, Suricata, and Nessus. Worked in the ISS team at Geojit supporting security operations and incident analysis. Currently a Project Associate at NIT Calicut. CEH-certified and focused on strengthening critical systems.

Professional Experience

Project Associate

NIT Calicut , Kerala | Dec 2025 - March 2026

- Edge Computing Assisted Block-Chain Based Cyber Resiliency Enhancement of Integrated Transmission and Distribution Systems

Information Security System - Intern

Geojit, Edapally, Kerala | Oct 2025 – Dec 2025

- Performed system security checks to prevent data exfiltration and ensure sanitization.
- Monitored and escalated security incidents via SIEM; supported audits and prepared antivirus/SOC reports.

Cybersecurity Researcher & Trainer

RedTeam Hacker Academy, Kottakkal, Kerala | June 2024 – June 2025

- Trained 300+ students and professionals on core cybersecurity principles, tools, and techniques including Ethical Hacking, Penetration Testing, and Incident Response.
- Developed and implemented an ethical hacking curriculum for students and professionals.

Education

Advanced Diploma in Cyber Defense

RedTeam Hacker Academy | April 2023 – January 2024

- Core Training: Ethical Hacking, Penetration Testing, Network Security

- Tools: Splunk, Nmap, Metasploit, Wireshark, Burp Suite, Suricata
- Activities: Red Team Exercises, Blue Team Monitoring, Vulnerability Scanning

B.Tech – Electrical and Electronics Engineering

Calicut University Institute of Engineering and Technology (CUIET) | August 2018 – November 2022

- Gained analytical and technical problem-solving skills applicable in control systems, automation, and system diagnostics.

Projects

- **Splunk SIEM Lab Deployment** – Deployed and configured Splunk Enterprise & Universal Forwarder; simulated attacks from Kali Linux to monitor real-time alerts and suspicious behaviors.
- **Wireless Attack Toolkit** – Developed Wi-Fi/Bluetooth jammer and deauther using microcontrollers to demonstrate wireless vulnerability exploitation and mitigation techniques.
- **P4wnP1 A.L.O.A Framework** – Converted Raspberry Pi Zero W into a covert red team USB attack platform for physical penetration tests and payload delivery
- **IoT-Based Smart Compost Bin (EEE Final Year Project)** – Integrated solar power and sensors for smart waste monitoring and automation using embedded systems.
- **Automatic Braking System** – Designed a real-time obstacle detection and auto-braking system.

Certifications

- Certified Ethical Hacker (CEH)
- Basic Programming Using Python
- Electric Power Systems
- NVEQF Level 2

Skills

Technical Skills

Penetration Testing | Ethical Hacking | Splunk | Suricata | Nessus | Wireshark | Network Security | Vulnerability Assessment | Metasploit | Modbus | IEC 61850 | Seceon | CloudSek | Microsoft Defender | Blockchain | Edge computing | Docker | Circuit Design and Analysis | Control Systems | Power Electronics | Matlab | OPAL-RT | SCADA | OT Security

Soft Skills

Communication | Problem-Solving | Time Management | Team Collaboration | Quick Learning | Attention to Detail | Adaptability | Critical Thinking | Listening
